Commission Narratives is based on the author's doctoral dissertation in Groningen (2002). The monograph offers the first overarching, comparative treatment of commission narratives in the canonical and apocryphal Acts of the Apostles, analysing them in their ancient literary setting. Following a survey of this widespread narrative theme in the cultural environment of early Christianity, Czachesz establishes a threefold social typology of divine commission (institutional, prophetic and philosophical) and explores the occurrences of the three types in the canonical and apocryphal Acts. The central chapters of the book provide a close reading of the textual evidence, investigating intertextual relations, the function of commission in the narrative structure, and the biographical models of self-definition that commission stories offered to the ancient readers in their changing social and ecclesiastical environments. Based on this textual analysis, Czachesz makes new proposals about the reconstruction, Sitz im Leben and dating of several apocryphal Acts. Finally, he examines the synchronic structure of commission, showing that the variety of commission narratives emerges from a constant set of motifs that are generated by interactions among the characters.

At the heart of this book is the controversy over whether Inca history can and should be read as history. Did the Incas narrate a true reflection of their past, and did the Spaniards capture these narratives in a way that can be meaningfully reconstructed? In Reading Inca History, Catherine Julien finds that the Incas did indeed create detectable life histories. The two historical genres that contributed most to sixteenth- and seventeenth-century Spanish narratives about the Incas were an official account of Inca dynastic genealogy and a series of life histories of Inca rulers. Rather than take for granted that there was an Inca historical consciousness, Julien begins by establishing an Inca purpose for keeping this dynastic genealogy. She then compares Spanish narratives of the Inca past to identify the structure of underlying Inca genres and establish the dependency on oral sources. Once the genealogical genre can be identified, the life histories can also be detected. By carefully studying the composition of Spanish narratives and their underlying sources, Julien provides an informed and convincing reading of these complex texts. By disentangling the sources of their meaning, she reaches across time, language, and cultural barriers to achieve a rewarding understanding of the dynamics of Inca and colonial political history. Although Mrs. Haywood was evidently not responsible for the inclusion of her tale in "The Female Dunciad," and although the piece itself was entirely innocuous, her daring to raise her head even by accident brought down upon her another scurrilous rebuke, not this time from the poet himself, but from her former admirer, Richard Savage.

The essays collected in this volume take a new look at the role of language in the thought of Martin Heidegger to reassess its significance for contemporary philosophy. They consider such topics as Heidegger's engagement with the Greeks, expression in language, poetry, the language of art and politics, and the question of truth. Heidegger left his unique stamp on language, giving it its own force and shape, especially with reference to concepts such as Dasein, understanding, and attunement, which have a distinctive place in his philosophy.

Much of the discussion explains how U.S. courts are organized and how they work. This introduction seeks to familiarize readers with the basic structure and vocabulary of American law, and afford a sense of how the U.S. legal system has evolved to meet the needs of a growing nation and its ever more complex economic and social realities.

The CEFR Companion volume broadens the scope of language education. It reflects academic and societal developments since the publication of the Common European Framework of Reference for Languages (CEFR) and updates the 2001 version. It owes much to the contributions of members of the language teaching profession across Europe and beyond. This volume contains: ? an explanation of the key aspects of the CEFR for teaching and learning; ? a complete set of updated CEFR descriptors that replaces the 2001 set with: - modality-inclusive and gender-neutral descriptors; - added detail on listening and reading; - a new Pre–A1 level, plus enriched description at A1 and C levels; - a replacement scale for phonological competence; - new scales for mediation, online interaction and plurilingual/pluricultural competence; - new scales for sign language competence; ? a short report on the four-year development, validation and consultation processes. The CEFR Companion volume represents another step in a process of engagement with language education that has been pursued by the Council of Europe since 1971 and which seeks to: ? promote and support the learning and teaching of modern languages; ? enhance intercultural dialogue, and thus mutual understanding, social cohesion and democracy; ? protect linguistic and cultural diversity in Europe; and ? promote the right to quality education for all.

For fans of Sarah Dessen and Mary H.K. Choi, this lyrical and emotionally driven novel follows Alina, a young aspiring dancer who suffers a devastating injury and must face a world without ballet—as well as the darker side of her former dream. Alina Keeler was destined to dance, but then a terrifying fall shatters her leg—and her dreams of a professional ballet career along with it. After a summer healing (translation: eating vast amounts of Cool Ranch Doritos and binging ballet videos on YouTube), she is forced to trade her pre-professional dance classes for normal high school, where she reluctantly joins the school musical. However, rehearsals offer more than she expected—namely Jude, her annoyingly attractive castmate she just might be falling for. But to move forward, Alina must make peace with her past and face the racism she experienced in the dance industry. She wonders what it means to yearn for ballet—something so beautiful, yet so broken. And as broken as she feels, can she ever open her heart to someone else? Touching, romantic, and peppered with humor, this debut novel explores the tenuousness of perfectionism, the possibilities of change, and the importance of raising your voice.

This book provides an introduction to the interplay between linear algebra and dynamical systems in continuous time and in discrete time. It first reviews the autonomous case for one matrix  $A$  via induced dynamical systems in  $\mathbb{R}^d$  and on Grassmannian manifolds. Then the main nonautonomous approaches are presented for which the time dependency of  $A(t)$  is given via skew-product flows using periodicity, or topological (chain recurrence) or ergodic properties (invariant measures). The authors develop generalizations of (real parts of) eigenvalues and eigenspaces as a starting point for a linear algebra for classes of time-varying linear systems, namely periodic, random, and perturbed (or controlled) systems. The book presents for the first time in one volume a unified approach via Lyapunov exponents to detailed proofs of Floquet theory, of the properties of the Morse spectrum, and of the multiplicative ergodic theorem for products of random matrices. The main tools, chain recurrence and Morse decompositions, as well as classical ergodic theory are introduced in a way that makes the entire material accessible for beginning graduate students.

It is offered here in the form of a book. These are Dee Lusby's methods unedited, in her own words. It is organized into several sections. The first is Dee & Ed's method of getting from mainstream beekeeping methods, back to biological methods. The appendices are sorted into research and articles in which Dee and Ed are credited, articles about Dee and Ed, a section of historic documents on cell size and the origins of the idea of enlarging the bees, and a section on other supporting documents on Varroa and treatments and anything that didn't fit in one of the other sections.

Introducing English Grammar introduces readers to the methodology and terminology needed to analyse English sentences. The approach taken is in line with current research in grammar, a particular advantage for students who may go on to study syntax in more depth. All the examples and exercises use real language taken from both standard and non-standard geographical areas and dialects, and include excerpts from Australian and British newspaper articles. Students are encouraged to think about the terminology as a tool kit for studying language and to test what can and cannot be described using these tools. This new edition has been fully updated and features: an expanded introduction; new texts and exercises that include data from social media; revised material on 'Grammar at work' and 'English worldwide'; more suggestions for further reading at the end of the book; a brand new companion website with extensive further reading and answers to the exercises, which can be found at [www.routledge.com/cw/borjars](http://www.routledge.com/cw/borjars). Written for readers with no previous experience of grammatical analysis, Introducing English Grammar is suited to anyone beginning a study of linguistics, English language or speech pathology, as well as to students whose interests are primarily literary but who need a better understanding of the structure of English.
