Atomic and molecular physics underlie a basis for our knowledge of fundamental processes in nature and technology and in such applications as solid state physics, chemistry and biology. In recent years, atomic and molecular physics has undergone a revolutionary change due to great achievements in computing and experimental techniques. As a result, it has become possible to obtain information both on atomic and molecular characteristics and on dynamics of atomic and molecular processes. This e-book highlights the present state of investigations in the field of atomic and molecular physics. Recent theoretical developments as well as new discoveries and observations are discussed. The Book should be of interest to students studying atomic and molecular physics and specialists in related fields of science and technology.

The CEFR Companion volume broadens the scope of language education. It reflects academic and societal developments since the publication of the Common European Framework of Reference for Languages (CEFR) and updates the 2001 version. It owes much to the contributions of members of the language teaching profession across Europe and beyond. This volume contains: ? an explanation of the key aspects of the

CEFR for teaching and learning; ? a complete set of updated CEFR descriptors that replaces the 2001 set with: - modality-inclusive and gender-neutral descriptors; - added detail on listening and reading; - a new Pre–A1 level, plus enriched description at A1 and C levels; - a replacement scale for phonological competence; - new scales for mediation, online interaction and plurilingual/pluricultural competence; - new scales for sign language competence; ? a short report on the four-year development, validation and consultation processes. The CEFR Companion volume represents another step in a process of engagement with language education that has been pursued by the Council of Europe since 1971 and which seeks to: ? promote and support the learning and teaching of modern languages; ? enhance intercultural dialogue, and thus mutual understanding, social cohesion and democracy; ? protect linguistic and cultural diversity in Europe; and ? promote the right to quality education for all.

International Schools have developed since their inception from a largely native English-speaking student body to schools such as the author's, the Vienna International School (VIS), where there are students of 90 nationalities with 65 mother tongues. Maurice Carder proposes a “three-programme model” for addressing the language and curricula needs of these students: a content-based second language programme; a programme of cultural and linguistic training for all staff; and a mother tongue programme for minority students. The model is based on research findings and practice: at the VIS every year approximately 1/3 of the graduating students gain an IB Diploma (International Baccalaureate) because they are able to take their mother tongue (other than English or German) as Language A1. The book contains insightful chapters not only for school leaders, programme designers and teachers, but also for parents. Inserted boxes of student responses give an authentic voice to the needs of second language learners, and many useful resources and websites are given.

IB Prepared resources are developed directly with the IB to provide the most up-to-date, authentic and authoritative guidance on DP assessment. IB Prepared: Spanish B

provides strategic guidance, authentic sample material and exam-style practice opportunities, allowing learners to consolidate the skills that are essential to success. The 'ECIS International Schools Directory 2009/10' contains up-to-date facts on more than 800 schools worldwide and comprehensive details of over 570 of them which are ECIS members.

The most comprehensive match to the new 2014 Chemistry syllabus, this completely revised edition gives you unrivalled support for the new concept-based approach, the Nature of science. The only DP Chemistry resource that includes support directly from the IB, focused exam practice, TOK links and real-life applications drive achievement. Speaking is a central yet complex area of language acquisition. The assessment of this crucial skill is equally complex because of its interactive nature. This book takes teachers and language testers through the research on the assessment of speaking as well as through current tests of speaking. The book then guides language testers through the stages of test tasks, rating practices and design.
