The Engaged University is a comprehensive empirical account of the global civic engagement movement in higher education. In universities around the world, something extraordinary is underway. Mobilizing their human and intellectual resources, institutions of higher education are directly tackling community problems – combating poverty, improving public health, and restoring environmental quality. This book documents and analyzes this exciting trend through studies of civic engagement and social responsibility at twenty institutions worldwide. This timely volume offers three special contributions to the literature on higher education policy and practice: a historical overview of the founding purposes of universities, which almost invariably included a context-specific element of social purpose, together with a survey of how these "founding" intentions have fared in different systems of higher education; a contemporary account of the policy and practice of universities – all over the world – seeking to re-engage with this social purpose; and an overview of generic issues which emerge for the "engaged university."

The second edition was released soon after to reflect the rapid progress of the internal audit profession. There have been a number of significant changes in the practice of internal auditing since publication of the second edition and this revised third edition reflects those changes. The third edition of The Internal Auditing Handbook retains all the detailed material that formed the basis of the second edition and has been updated to reflect the Institute of Internal Auditor's (IIA) International Standards for the Professional Practice of Internal Auditing. Each chapter has a section on new developments to reflect changes that have occurred over the last few years.
