Mirza Ghalib is to the Urdu language what William Shakespeare is to the English language. And the most widely read Urdu book in the world is a collection of the Love Sonnets of Ghalib. These sonnets resonate with the voices of maestros through the corridors of history. Ghalib is not just an Asian phenomenon and his sonnets are loved and studied worldwide.

Ambassador Sullivan tells of his many meetings with the shah and gives a unique insight into the character, the moods, and the motivations of that complicated man. He explores the political, economic, and social backgrounds of the opposition to the shah, and in doing so shows us the force of Islam in Iranian society and the flat impossibility of the shah's attempts to industrialize the country. Other highlights of this eminently readable narrative include the General Huyser mission, which Washington mindlessly thought could reverse a revolution that was all but completed, the evacuation of 35,000 American citizens from a country in turmoil, and the destructive seizure of the embassy compound in February 1979, a full nine months before the taking of the hostages. The policy recommendations that Sullivan made to Washington

during the Iranian crisis were rejected by President Carter and Zbigniew Brzezinski in favor of policies that seemed, then as now, unrealistic. This account is valuable not only as a record of recent history, but as an example of how United States national interests can be damaged by the absence of clear, informed leadership in the White House.

Once upon a time, there were five little girls who believed in themselves and in the women they wanted to be. One fine day they stood gazing at the fragmented remains of their wings smashed by the patriarchal society. Calmly they observed the broken, blurry pieces that silently glittered on the ground. And yet they felt so proud of their reflections and shadows that smiled back at them. The society by all means could chop off their wings but their spirits were indomitable. And though these women with a spine of steel, at times could be broken, but could never be defeated. They rose unfettered, unbeaten, unimpeded. "Overcome And Become" is the story of those five resilient, remarkable extraordinary, gritty, daring (S)Heroes from Punjab. It's a saga of confidence, courage and compassion. It's a tribute and salute to the Daughters of Punjab - Surinder Kaur, Amrita Pritam, Dr. Kiran Bedi, Dr. Inderjit Kaur and last but not the least, Amrita Shergil. There is something these inspirational women all share in common: they are all warriors and continue to inspire us in our own modern lives.

Preet has a magical flow in her writing, may it be the expression of fondness, regard or the pain of losing her subject. I was extremely touched by her superior usage of simple, effective and appropriate language. I am so sure that all readers when they go through this piece of art, they'll shower their blessings upon her. - DOLLY GULERIA As I finished reading "Overcome And Become" I feel nostalgic. I wanted to keep reading more and more about the gritty, phenomenal, inspiring women. Well done Preet!! Each word penned by you has come straight from your heart and reached where it should, deep within the hearts of the readers. In a surreal way again I feel you have wrapped all the women of Punjab in that beautiful dupatta I wore..... - DIVYA DUTTA (from the foreword)

For fans of *The Hunger Games*, *Battlestar Galactica*, and *Blade Runner* comes the first book in the *Partials Sequence*, a fast-paced, action-packed, and riveting sci-fi teen series, by acclaimed author Dan Wells. Humanity is all but extinguished after a war with Partials—engineered organic beings identical to humans—has decimated the population. Reduced to only tens of thousands by a weaponized virus to which only a fraction of humanity is immune, the survivors in North America have huddled together on Long Island. But sixteen-year-old Kira is determined to find a solution. As she tries desperately to save what is left of her race, she discovers that that the survival of both humans and Partials rests in her attempts to answer questions about the war's origin that she never knew to ask. Playing on our curiosity of and fascination with the complete collapse of civilization, *Partials* is, at its heart, a story of survival, one that explores the individual narratives and complex relationships of those left behind, both humans and Partials alike—and of the way in which the concept of what is right and wrong in this world is greatly dependent on one's own point of view. Supports the Common Core State Standards

Excerpt from *An English-Malay Dictionary* The accomplishment of the author's original intention, which was to produce an english-malay Vocabulary containing some three or four thousand words, has been so long deferred through pressure of other literary work, that it has been thought better to abandon it altogether, especially in view of the fact that other vocabularies have appeared meanwhile which supply the need for a limited word list. The scope of the original work 'has therefore been greatly extended, with the object of producing not a mere Vocabulary but a Dictionary which would be as complete as possible. On Christmas the world's freedom died. Every man, woman and child lay in the grip of fear, for no one knew at what moment his nearest friend or a casual stranger might suddenly be possessed by some brutal mind ... and begin to murder and destroy. For Chandler it was worse than for most. He was both victim and executioner. He had suffered himself, and he had committed a violent crime while under the strange domination. Accusing of hoaxing he was driven from his home. He wandered the world and found it smashed like a spoiled child's plaything - now Chandler was in the very presence of the destroyers! But what could one person do against such power? - the power of gods!

The works of Edward Sapir (1884 - 1939) continue to provide inspiration to all interested in the study of human language. Since most of his published works are relatively inaccessible, and valuable unpublished material has been found, the preparation of a complete edition of all his published and unpublished works was long overdue. The wide range of Sapir's scholarship as well as the amount of work necessary to put the unpublished manuscripts into publishable form pose unique challenges for the editors. Many scholars from a variety of fields as well as American Indian language

This book addresses key questions about the materials used for the wind instruments of classical symphony orchestra such as flutes, clarinets, saxophones, oboes, bassoons and pipe organs. The content of this book is structured into four parts. Part 1- Description of materials for wind instruments deals with wood species and materials for reeds used for making clarinet, oboe and bassoon- and, with metallic materials and alloys for - horn, trumpet, trombone, etc. Auxiliary materials associated with the manufacturing of wind instruments are felt, cork, leather and parchment. Part 2- Basic acoustics of wind instruments, in which are presented succinctly, some pertinent aspects related to the physics of the resonant air column. An important aspect discussed is related to the effect of wall material on the vibration modes of the walls of wind instruments. The methods for measuring the acoustical properties of wind instruments are presented. Part 3- Manufacturing of wind instruments, describes the technology used in manufacturing metallic tubes and pipes made of wood. Part 4 - The durability and degradation of materials addresses data about methods for cleaning wind instruments, studies factors producing degradation of organ pipes, describes methods of conservation and restoration of brass instruments and of historical pipe organs. Finally, the properties of marble are described, being the only one nondegradable and sustainable material used for pipes for organs.

film of both legend and hyperrealism. The story of The Lion King has entered the pantheon of cultural mythology, as has its iconic music. In revisiting this tale, the filmmaking team set off for an adventure of a lifetime: an expedition across the southern portion of Kenya in Africa. These seasoned filmmakers gathered reference photographs, scans, and other materials to apply to the digital moviemaking process and in turn were immersed in the nuances of the real environment. Once back at the studio, they utilized common filmmaking tools with state-of-the-art virtual reality (VR) technology and new, ultrafast rendering technologies to create a "virtual production," a concept they pushed further than it had ever been before. The Art and Making of The Lion King documents this captivating journey and closes the circle with a discussion on a modern-day conservation program called the Lion Recovery Fund (LRF).

The Mathematics of Magic was probably the greatest discovery of the ages - at least Professor Harold Shea thought so. With the proper equations, he could instantly transport himself back in time to all the wondrous lands of ancient legend. But slips in time were a hazard, and Shea's magic did not always work - at least, not quite as he expected . . . This omnibus volume of all of the Magical Misadventures of Harold Shea contains The Incomplete Enchanter, The Wall of Serpents and Castle of Iron

In all of his travels Captain Jean-Luc Picard has never faced an opponent more powerful than Q, a being from another continuum that Picard encountered on his very first mission as Captain of the Starship Enterprise™. In the years since, Q has returned again and again to harass Picard and his crew. Sometimes dangerous, sometimes merely

obnoxious, Q has always been mysterious and seemingly all-powerful. But this time, when Q appears, he comes to Picard for help. Apparently another member of the Q continuum has tapped into an awesome power source that makes this being more powerful than the combined might of the entire Q continuum. This renegade Q is named Trelane, also known as the Squire of Gothos, who Captain Kirk and his crew first encountered over one hundred years ago. Q explains that, armed with this incredible power, Trelane has become unspeakably dangerous. Now Picard must get involved in an awesome struggle between super beings. And this time the stakes are not just Picard's ship, or the galaxy, or even the universe, this time the stakes are all of creation.

In recent years, there has been a resurgence of interest in linguistic borrowing, especially with regard to its importance in the reconstruction of pre-history. However, the general literature on borrowing has been based on a somewhat restricted range of data, tending to concentrate on the languages of Europe or the Americas. The Pacific has not figured prominently in such discussions. Linguists and anthropologists have long considered the Pacific to be a kind of laboratory because the geographical discreteness of its cultures allows clearer inferences to be made than are usually possible in a continental situation. Borrowing in the Pacific is relatively easy to identify and stratify. Its study is, therefore, especially useful in the reconstruction of the linguistic, social and cultural history. The scope of this volume is not solely restricted to borrowing in Oceanic languages, but includes two papers on borrowing in Fiji Hindi and Fiji English. Authors have been encouraged to address general issues of borrowing from the perspective of data they have derived from their fieldwork, thus avoiding the risk of producing a series of largely similar contributions. The volume also includes a number of seminal and authoritative papers on Pacific borrowing that have been previously published.

There is also an extensive list of commonly occurring birds, plants and trees, translated from Yoruba into English alongside their botanical equivalents.

"After traveling through the cities of Hangzhou, China, Boston, U.S.A., Bangalore, India, and Lyon, France; after 107 conversations within these cities, and after studying the thoughts of Gilles Deleuze, Rick Dolphijn explores the realms of food. Traveling throughout the world AND the world of philosophy, he opens up four different spaces (the four different parts of this book) in which various experiments take place in thinking how we relate to the edible; connecting the edible to such concepts as the self, the event, the State, health, dietetics, territoriality, capitalism, and nomadology, to name just a few. He shows us how the micropolitics of food is capable of showing us everything. Thus, it performs an ethics of life"--P. [4] of cover.

The 25-year period beginning with the Allied occupation of Italy in 1943 and ending with the social upheavals of 1968 witnessed a renaissance of artistic development that touched virtually every part of Italy's culture, with painters like Lucio Fontana challenging painting's two-dimensionality and traditional subject-matter. In the United States, artistic preeminence in the postwar period is generally accorded to Americans; this volume, which includes 20 essays and over 600 color reproductions, demonstrates that in terms of invention and influence Italian artists played a varied and important role during this period.
