Over the past two decades there has been a rapid transformation of masculinities in the West, largely facilitated by a decline in cultural homophobia. The significant changes in the expression of masculinity, particularly among younger generations of men, have been particularly evident in men's team sports, which have become an increasingly diverse and inclusive culture. Drawing upon work from a wide range of established and emerging international scholars, this

Socrates, an Athenian soldier, was a calmly efficient killing machine. His student Plato was an accomplished and broad-shouldered wrestler. Martial arts and philosophy have always gone hand in hand, as well as fist in throat. Philosophical argument is closely parallel with hand-to-hand combat. And all of today's Asian martial arts—like Karate, Kung-Fu, Judo, or Aikido—were developed to embody and apply philosophical ideas. The Japanese martial tradition of Budo, for instance, was influenced by the three philosophical traditions of Shinto, Confucianism, and Zen Buddhism, and these philosophies are still taught in Japanese martial arts schools all across the world. As Damon Young explains in his chapter, the Japanese martial arts customs of courtesy are derived from Shinto purity, Confucian virtues, and the loving brutality of Zen. In his interview with Bodidharma (included in the book), Graham Priest brings out aspects of Buddhist philosophy behind Shaolin Kung-Fu—how fighting monks are seeking Buddhahood, not brawls. But as Scott Farrell's chapter reveals, Eastern martial arts have no monopoly on

philosophical traditions. Western chivalry is an education in and living revival of Aristotelian ethical theories. The Western martial art of fencing is explored by Nick Michaud, who looks at the morality of selfishness in fencing, and Christopher Lawrence and Jeremy Moss, who try to pin down what makes fencing unique: is it the sword, the techniques, the footwork, the aristocratic aura, or something else? Jack Fuller argues that his training in Karate was an education in Stoicism. Travis Taylor and Sasha Cooper reveal the utilitarian thinking behind Jigoro Kano's Judo. Kevin Krein maintains that the martial arts are a reply to the existentialist's anxiety about the meaninglessness of life. Patricia Peterson examines Karate's contribution to feminism, and Scott Beattie analyzes the role of space in the martial arts school. Joe Lynch pits the Western ideas of Plato against the Eastern ideas of the Shaolin monks. Bronwyn Finnigan and Koji Tanaka uncover the meaning of human action as it appears in Kendo. Rick Schubert explains the meaning of mastery in the fighting arts. Moving to ethical issues, Tamara Kohn discovers what we owe to others in Aikido. Chris Mortensen questions whether his own Buddhist pacifism is compatible with being a martial artist. In different ways, Gillian Russell and John Haffner and Jason Vogel assess the ways in which martial arts can morally compromise us. How can the sweaty and the brutal be exquisitely beautiful? Judy Saltzman looks into the curious charm of fighting and forms, with help from Friedrich Nietzsche. Analyzes karate techniques commonly preferred by contestants in sport bouts. Explains the kinetic

This book represents an alternative perspective on international elite sport systems. It focusses on the embedded multi-level nature of leadership, and the scope that this might give for degrees of leadership autonomy and discretion. The chapters show how mechanisms of leadership on different levels

interact. The nature and mix of leadership mechanisms reflect values and expectations related to specific political, normative and commercial sport contexts. Three introductory chapters outline key elements of these dimensions of elite sport contexts. Seven empirical cases illustrate how national contexts facilitate and constrain leadership practices, related to specific sports across Russia, China, Ghana, Germany, Switzerland, Denmark, Norway and the US. The final chapter discusses embedded multi-level leadership from a comparative perspective. Based on the countries covered, the book distinguishes between three groups: state-dominated systems, state-elite sport partnership and countries with a passive state, with no state intervention. This book is important reading for researchers and students with an interest in sport management, sport development, sport policy and sport governance, as well as for policy-makers, performance directors and managers working in elite sport.

In this first synthetic, comprehensive survey of Japanese sports in English, the authors are attentive to the complex and fascinating interaction of traditional and modern elements. In the course of tracing the emergence and development of sumo, the martial arts, and other traditional sports from their origins to the present, they demonstrate that some cherished "ancient" traditions were, in fact, invented less than a century ago. They also register their skepticism about the use of the samurai tradition to explain Japan's success in sports. Special attention is given to Meiji-era Japan's frequently ambivalent adoption and adaptation of European and American sports--a particularly telling example of Japan's love-hate relationship with the West. The book goes on to describe the history of physical education in the school system, the emergence of amateur and professional leagues, the involvement of business and the media in sports promotion, and Japan's participation in the Olympics.

For the first time in print, Adam Gibson and Bill "Superfoot" Wallace present the system that made Wallace a martial arts legend. Gibson and Wallace begin by teaching the seven primary techniques of the Superfoot System. They then present the best attacks and countermaneuvers for you to apply in a variety of fight situations. Drawing and luring techniques show you how to set up opponents, opening them to your attacks. Evasive maneuvers and blocking techniques help you fend off their best attacks. Specific strategies highlight your personal strengths and exploit your opponents' weaknesses. Training and sparring programs will build the speed, power, flexibility, stamina, and mental toughness that are essential for success in competition.

This is the first book in English that adopts a critical socio-historical perspective to examine the important themes and challenges of Asian indigenous culture and sport. Written by leading sport historians and scholars, the chapters in the book contain real-life case studies and comparative studies in Asian sport. The book examines the history, contemporary governance and management, gender, and ethnic issues embedded in folk sports and physical culture, and the challenges faced by Asian indigenous sports and their evolution. Based on cutting-edge research from China, Japan, Korea, Israel and beyond, this book will be a valuable addition to any course in sport history, sport culture, sport development and sport sociology. It will stimulate those who are seeking ways to promote and develop indigenous sports, from intangible cultural heritage protection to global sport partnership. It will also be of interest to students, researchers, and practitioners, who wish to understand the changing face of Asian society and Asian indigenous sport. The chapters in this book were originally published as a special issue of *The International Journal of the History of Sport*.

Budo, the way of the martial arts, is at heart a path of spiritual cultivation and self-realization whose aim is to develop a strategic mind that makes combat unnecessary. Kenji Tokitsu explains the philosophy of karate as budo and looks deeply at the key concepts that are essential for developing the budo mind in karate practice. These concepts are: • distance and timing, • rhythm, anticipation, and intuition, • and the cultivation of explosive but focused energy. These concepts are difficult to teach, but mastering them is the ultimate goal of any true martial artist. Tokitsu expertly guides the reader through these elusive ideas with clarity and a practical view.
